- Bachelor of Science in Information Technology.
- Completed second year with 4 distinctions and 73% average.

2020 - 2021

NORTH-WEST UNIVERSITY

- Bachelor of Chemical Engineering.
- Finished my 1st year with 10 distinctions.

2015 - 2019

HIGHSCHOOL VEREENIGING GIMNASIUM

- 3 Distinctions

PROFILE

I thrive in fast-paced environments and excel at quickly adapting to new challenges. My commitment to excellence and willingness to invest the necessary hours distinguish me as an exceptional individual. I am driven to consistently push myself to be the best version possible, motivating me to work diligently and go above and beyond expectations.

I am deeply passionate about animals and wildlife. My future aspirations involve seamlessly integrating my profound love and knowledge of animals with my IT skills. I am eager to explore ways to bring together these two aspects of my expertise.

WORK EXPERIENCE

-
- | | |

PROJECTS

University Group Project | Recode

2025

Frontend Team Lead

- Leading the frontend team throughout this project.
- Designing the wireframes with Figma.
- Building the frontend web application with Vue.js
- Version control and sprints are managed in Github.
- Hosting is done on Vercel.
- [Recode Github Organization](#)
- [Recode Wireframe Prototype](#)
- [Recode Hosted Frontend](#)
- [Recode Hosted User Documentation](#)

Personal Project | BlazorWebAssembly

2024

Full-Stack Development

- Built a full-stack web application using Blazor WebAssembly, .NET, and Microsoft SQL Server to enhance my understanding of modern web development. Focused on key concepts like component-based architecture, state management, and database integration. Designed and implemented various features to explore real-world e-commerce scenarios. Enhancing skills beyond university curriculum through hands-on experience with full-stack development.
