Lené Kriel

- BSC INFORMATION TECHNOLOGY
- JUNIOR SOFTWARE ENGINEER
- UI/UX DESIGNER

Description

I thrive in fast-paced environments and excel at quickly adapting to new challenges. My commitment to excellence and willingness to invest the necessary hours distinguish me as an exceptional individual. I am driven to consistently push myself to be the best version possible, motivating me to work diligently and go above and beyond expectations.

I am deeply passionate about animals and wildlife. My future aspirations involve seamlessly integrating my profound love and knowledge of animals with my IT skills. I am eager to explore ways to bring together these two aspects of my expertise.

Work Experience

Junior Software Engineer & UI UX Designer   **2025 - Current**
Twenty Degrees

Developing in-house and client products with PHP, Laravel, Vue.js, MySQL and variety of hosting and project management platforms. Designing and prototyping products with Figma.

KLS MEDIA   **2021 - 2024**
COO, Photographer, Social Media Management

Photoshoots, videography and designs for clients. Manage social media accounts and maximize SEO

Hennie's Potchefstroom   **2022 - 2023**
Waitress

This entailed cleaning the restaurant, managing tables, taking orders and provide excellent client service

Veterinary   **2019 - 2020**
Intern / Job Shadowing

Worked over 300 hours within the veterinary business for practical hours to apply for studies. This included house pets, wildlife, and farms.

Project

Personal Project | BlazorWebAssembly

Built a full-stack web application using Blazor WebAssembly, .NET, and Microsoft SQL Server to enhance my understanding of modern web development. Focused on key concepts like component-based architecture, state management, and database integration. Designed and implemented various features to explore real-world e-commerce scenarios. Enhancing skills beyond university curriculum through hands-on experience with full-stack development.
